SIRES DIRECTORY 2021

A VERY ATTRACTIVE OFFER IN SEXED SEMEN

THIS FIRST PROOFS RUN OF THE YEAR ALWAYS COMES WITH CHANGES DUE TO THE ROLLING BASE AND FEW FIRST DAUGHTERS FOR GENOMIC SIRES. IF WE HAVE TO WAIT FOR THE JUNE PROOFS RUN TO HAVE A MORE MASSIVE ARRIVAL OF DAUGHTERS, TWO BULLS INTEGRATE THE PROGENY TESTED JB SIRES RANGE. AT THE SAME TIME, THE GENOMIC JB OFFER REMAINS THE SAME AS IT WAS BEFORE, BUT 4 OF THE DECEMBER GENOMIC JB'S WILL EXPAND THE SEXED JB OFFER.

NEW SIRES IN PROGENY TESTED RANGE: MAXENT JB AND MAGIC JB

Released as Genomic sires in 2017, **MAXENT JB** and **MAGIC JB** have now joined the progeny tested sires range. Broadcasted in videos during JURAEXPO, you could discover from the beginning of the year their first daughters calved in the Jura.

MAGIC JB

(Hummer/Faucigny)

With about thirty daughters, **MAGIC JB** confirms his **JB HEALTHY** and **JB CONTENT** profile: +1.6 in Udder Health, +1.3 in Fertility and 93 in Calving ease which makes him easy to use on heifers, he is also improving in both Fat and Protein content and is A2A2. With an Udder ranked at 117, **MAGIC JB** confirms his maternal strains' qualities.

MAXENT JB

(Horton/Ghana JB)

Improver in milk (+ 605 kg)

and neutral in Protein (+0.1), **MAXENT JB** combines production quality with good functional traits: SCC + 0.6, LGV + 1.0, REPRO + 0.0. His udder synthesis at 122 points is characterized, among other things, by an extremely long front attachment (140) and a strong ligament (117).

MAXENT JB is available in

conventional doses from today and will be in sexed doses from May.

To be noted, the good progression of **LOGALY JB** with 140 points of ISU (+ 5 points) which associates in particular dairy potential (+807 kg in Milk, +0.8 in Protein and A2A2) and a balanced Morphology ranked at 111.

OGECIBELLE (MAXENT JB/VARENNE JB)
GAEC MARGUIER RÉGIS ET CHRISTELLE (39)

Odilia (Magic JB/Tilleul JB)

GAEC IONI • Val Suran (39)

1st lactation • Best Control : 26,7 kg

Age of 1st calving : 28 months

Olipop (Magic JB/Ibreuil JB) • Champion of JURAEXPO 2021

GAEC Millet Mickaël et Caroline • La Marre (39)

1st lactation • Best Control : 27,6 kg

Age of 1st calving : 28 months

SEXED JB SIRES: 4 OF THE DECEMBER SIRES AVAILABLE IN JB SEXED!

Remember in December, the proofs run revealed some very interesting sires with various profiles including **PLERIN JB** (more info on page 7), **PHILIPS JB**, **PIFROU JB** and **PANINI JB**. They are now available in sexed doses. SEXED JB or conventional GENOMIC JB, the choice is yours!

With **MAXENT JB** and these 4 new sires, the 2020-2021 sexed offer is reinforced once again.

MANDIE, MOTHER OF PANINI JB • GAEC BLONDET (39)

PLERIN JB (*Nitchi JB/Cargo*) : MILK +451 kg ; Prot +1.6 ; SCC +1.6 ; TY 117 ; UD 118

PIFROU JB (*Nurofen JB/Vigor JB*) : Prot +0.6 ; SCC +0.8 ; TY 124 ; UD 122 ; MU 102

PHILIPS JB (*Nitchi JB/Logaly JB*) : MILK +823 kg ; Prot +0.8 ; TY 121 ; UD 117

PANINI JB (*Milton/Istapic*) : Prot +1.3 ; SCC+0.8 ; TY 120 ; UD 116 ; MU 109

GENOMIC JB SIRES: A COMPLETE RANGE

Including the SEXED JB SIRES, about 40 GENOMIC JB SIRES are available. More information in the genetic offer chart on pages 6-7.

Among them, we find great dairy bulls: **PESTO JB** (*Nino JB*) (+ 930 kg, +1.8 in SCC, +0.9 in REPRO, 123 in Udder), **PALMAS JB** (*Modelo JB*) (+895 kg, +1.5 in SCC, 114 in TY), **PADRE JB** (*Medicis JB*) (+1,040 kg, 93 in CE); bulls with very good morphology including **OYONNAX JB** (*Jiteuf JB*) (132 TY, 126 UD), **OBREZAC JB** (*Macintosh*) (120 TY, 130 UD), **OXIBIS JB** (*Mauléon JB*) (120 TY, 121 UD); bulls with more variable pedigree including **PERITEL JB** (*Merckx JB*) (+711 MILK, +0.7 SCC).

LAÏKA (HARPON JB), MOTHER OF PALMAS JB (MODELO JB)
GAEC DU PRIEURÉ (39)

FISTULINE • GAEC DE LA RANDOUILLE (53)
GOING BACK TO THE FAMILY TREE OF PESTO JB, WE FIND
URSULINE (MICMAC), MOTHER OF FISTULINE (URBANISTE),
GREAT CHAMPION AT SPACE IN 2015

In order to meet your expectations, the sexed offer is renewed more and more frequently. See you at the next proofs run, on June 15, to discover new sires.

THE RANGES:

JB MILK

Sires with Milk in quantity.

JB CONTENT

Sires with Content for productivity.

JB MILK & MEAT

Sires with Milk and Muscularity to get the dual-purpose ability of the breed.

JB HEALTHY

Sires with the best combination with calving ease and functionals traits.

JB GRAZING

Sires with content, giving easy to manage cows with average body condition.

JB CROSS

Sires combining easy calving, good quality and health of udders, with good reproduction.

JB ROBOT

Sires combining good teat orientation, strong on feet and legs, good on milking speed, and temperament.

With his two sons **POISY JB** and **ODOMAR JB** in the catalog, **MAXENT JB** meets his half-sibling **PADRE JB** (*Medicis JB*). Both were born in Brittany, at the GAEC MONTBELOG. Their dam JAMAICA (*Ghana JB/Tipoli*) is currently in her 5th lactation. Her previous lactations average 8,807 kg at 32.9 Protein. Their granddam ESPAGNA (*Tipoli*) has 6 completed lactations averaging 8,631 kg at 32.3 Protein.

Half-sibling of **OBSALIM JB** and uncle of **PUZZLE JB**, **PLERIN JB** was born at GAEC DE MARVALLIN (42). He comes from a line of solid cows, in which functional traits and udders are at the rendezvous. With a best lactation (2nd) at 11,798 kg (in 305 days) at 32.7 Protein, his dam JAVEL PAT (*Cargo*) starts a new lactation at 52 kg (second dairy control). The number of lactations of the 3 other ascendants varies between 5 and 7 and the average lactation is between 9,400 and 10,066 kg.

Nephew of **NEXEN JB** (*Helux/Damas/Robin*), **PALMAS JB** comes from 3 generations of cows indexed at more than 700 kg in milk and originating from EARL GUIGON (71). **PALMAS JB** was born at the GAEC DU PRIEURÉ, in the Jura. His dam LAIKA (*Harpon JB*) produced on her first two lactations 10,050 kg average at 35.9 Protein. Titleholder at the 2019 National, on the front page of last summer's catalog, his first daughters are in lactation and one of his grandsons has joined the individual control station.

#JURAEXPO - A NEW 100 % DIGITAL EDITION

IN ORDER TO ADAPT TO THE HEALTH CONTEXT, THE 21ST EDITION OF JURAEXPO TOOK PLACE 100% VIRTUAL. FOR EIGHT WEEKS, FROM JANUARY 20, THE DATE ORIGINALLY SCHEDULED FOR THE PROGENY PRESENTATION AT JURAPARC, UNTIL MARCH, VIDEOS WERE SHOWN, ONE TO THREE TIMES A WEEK.

The challenge was big but it was without counting on the motivation of all the actors. Indeed, breeders, technical and communication teams had at heart to make this edition possible. Since neither the cows nor the public could come to JURAPARC, we had to bring them virtually to you. **More than 200 females were filmed in 70 Jura herds over 18 days.**

*Liane (Imanol JB/Soja JB) • Best Senior Cow JURAEXPO 2021
GAEC BAILLY Jean-Noël et Isabelle • Menetru le Vignoble (39)*

Thus, you could discover over the weeks lots of descendants of **JARDIM JB, LOGALY JB, JITEUF JB, LINAO JB, LIROUD JB, JOLYMPE JB, MAXIMO JB** as well as a lot of daughters of variable sires and for the final video, the long-awaited lot of novelties.

In parallel, videos of the elite cows were shown, **in collaboration with the Syndicat Jurassien de la Race Montbéliarde.**

Thanks to **all the breeders for their investment**, the preparation of the animals and to you, the public who followed us throughout this wonderful adventure.

We hope that this 100% digital edition has brought you satisfaction and allowed you to see the MONTBELIARDE JB genetics at its best. **We hope that you have enjoyed discovering it as much as we have enjoyed making it.**

You can still find all those videos by looking at www.juraexpo.fr

APRIL - CHANGE OF ROLLING BASE

THIS FIRST PROOFS RUN 2021 IS, AS EVERY YEAR, SYNONYMOUS WITH A CHANGE OF BASE. THE FEMALE BREED REFERENCE POPULATION, TO WHICH ALL BREEDING STOCK IS COMPARED, IS THEREFORE CHANGED.

Genetic evaluations for dairy cattle are expressed as a deviation from a population of females changing at the 1st treatment of the year. For 2021, this refers to cows born from 2013 to 2015. Any genetic improvement in this reference population results in an apparent decrease in the indexes of all breeding animals, whether male or female.

For this edition, the decrease linked to the rolling base is 38 kg of milk; 2 points of INEL; 3.2 points of ISU; 1 point of udder and 1 point of morphology.

NEXT PROOFS RELEASE: JUNE 15, 2021
